

Please see the details below regarding a few recent updates to Hero:

1. [Custom Groups](#) Enhancements

- We addressed an issue that was preventing users from adding students with zero points to a custom group.
- To better accommodate the needs of specials/electives teachers, guidance counselors, clubs, etc., we also increased the number of unique groups allowed to 40.

2. Move to Open Source Fonts

To better align with industry standards, we have updated our fonts library. Users may notice a slight change in the fonts used within Hero.

3. District Dashboard: School-Level Widgets

District administrators who have been using the *District Dashboard School Comparison* can now drill down into a *School Performance Dashboard* view.
